

## Form Letter in Support

To whom it may concern, (State grant representatives)

As a resident of the area served by CRFPD [and CFD] ensuring that the CRFPD Locke fire station be structurally sound to the best of today's available seismic standards is important to me, my family, and my community. I ask that you too see the value in the Locke station to my community. Losing any station in a network of fire stations will affect total response time for fire fighters to respond to our medical or fire emergencies thus increasing the seriousness of any event. Knowing that Locke fire station is home to the volunteer firefighters that live there make it even more crucial to know that the building is safe, and functional.

Knowing that any serious seismic event would mean many tragedies, injuries and ongoing community stresses, having our fire station functional following an event is crucial.

Thanks for your consideration. I am offering my name and physical address as a testament to the desire to improve Locke fire station's seismic resilience through your grant offering.

Regards,

Name & Physical Address
